

# User documentation

**This documentation will guide you through the proper use of the application. Read this file thoroughly.**

## Functionality:

- keeping track of tasks to be done;
- adding new tasks;
- deleting tasks;
- moving tasks up and down;
- preventing from accidental tasks loss.

## Description:

★ This application keeps track of tasks that users are going to do. It prevents from accidental data loss when users want to leave the page or reload it. A corresponding warning pop-up window will be shown.

★ Users type in their task and add it with the according green button. A new task will be added to the list of tasks. Empty values won't be added to the list. Tasks can be moved up and down and

also deleted completely. The first task cannot be moved up. The last task cannot be moved down.

This application has already been deployed and available to use via the link: <https://sleeplessglory.github.io/to-do-list>
